Version History

1.0	Retired
1.1	Retired
1.2	Retired
1.3	Governance consolidation incorporating ratified constitutional questionnaire and meeting clarifications

Preamble

The Redbelly Community DAO exists to steward the growth, adoption, and decentralisation of the Redbelly Community DAO (not Redbelly Network itself). This Constitution defines how the DAO operates, allocates resources, and empowers contributors. While initially top-down for efficiency and integrity, the DAO will progressively decentralise as its contributor base and processes mature.

Version 1.3 supersedes prior structural interpretations where the ratified governance questionnaire introduced validated updates to leadership structure, voting mechanisms, compensation model, and execution safeguards.

1. Treasury Overview

1.1 Assets

Token Treasury	10,000,000 RBNT for incentives, rewards, grants
Stablecoin Reserve	100,000 USDT annually for operational costs and contributor payments
Revenue Source	2.5% of network fees streamed to the DAO treasury monthly

1.2 Budgeting Framework

- Quarterly budgeting structure adopted for predictability.
- Flexibility permitted at early-stage DAO maturity where necessary.
- A minimum 10% reserve allocation should be maintained at all times.

2. Governance Structure

2.1 Governance Phases

Phase	Description
0	High Council (community members assisting marketing team) manage setup, tooling, and early disbursements via multisig
1	Delegated Governance: Leaders propose and approve items with tokenholder input
2	Full DAO Governance: All tokenholders may submit and vote on proposals through decentralised tools

Each phase will have target timelines, reviewed quarterly and published publicly by the High Council. If dependencies outside the DAO's control delay progress, revised timelines will be shared to prevent indefinite stalling.

2.2 Treasury Management

- The DAO treasury is held in a secure multisig wallet (e.g. Palmera) with public signers.
- All use of treasury funds must follow the defined proposal process and receive approval.
- Network fees (2.5%) are automatically streamed into the treasury monthly via smart contract.

2.3 Voting Power

- Phase 0 & 1: Voting power is proportional to RBNT held or delegated (weighted voting)
- Leaders may vote, but Leaders may not cast more than one vote per proposal
- Conflict of Interest: Individuals must recuse from voting on their own proposals

2.4 Leadership Composition

The DAO leadership structure will consist of:

- 3 High Council Members
- 5 General DAO Leaders

2.5 Geographic Limitation

To ensure decentralisation and geographic diversity:

- Maximum one (1) person per country in the High Council.
- Maximum one (1) person per country in General DAO Leadership.
- Maximum total of two (2) leadership representatives per country across both bodies.

2.6 Mandates

- Leadership mandates last six (6) months.
- Mandates are renewable through vote.
- Leaders may be removed in case of KPI breaches, misconduct, or sustained non-performance.

2.7 Arbitration Authority

- In the case of a formal voting deadlock or tie in governance decisions, the High Council holds final arbitration authority.
- This authority applies only to resolving ties and does not override standard voting outcomes.

2.8 Delegation & Non-Objection

- A Leader may delegate their vote to a High Council member for informal governance discussions if their voting intention is clearly communicated in advance.
- Silence or non-response within a formally defined timeframe may be considered non-objection.

3. Governance Process/Proposal Lifecycle

3.1 Governance Philosophy

- The DAO adopts a “Discussion First, Proposal Second” model.
- Not all discussions require immediate formal proposal submission.

3.2 Process Overview

1. Submit proposal via [Google form](#)
2. Review by High Council
3. Feedback via Discord (3-day window)
4. Vote via Snapshot (using ranked voting (preferably anonymous). A single voting round is used to fill open positions).
5. Execution phase begins
6. Final Review by High Council
7. Payment + Archive (with public record)

3.3 Open Innovation Track

- For submissions outside mandates
- Pilot limit: 100,000 RBNT or 5,000 USDT
- Still follows full review and vote process

3.4 Proposal Submission Limit

- A maximum of one (1) proposal per person per month is permitted.

3.5 Snapshot Voting

- Voting occurs via Snapshot using ranked voting (preferably anonymous).
- A single voting round is used to fill open positions.

3.6 Pilot Testing

- Approved initiatives may undergo a 2–4 week pilot period before full continuation, adjustment, or revocation.

4. Conflict of Interest Policy

- Leaders, Council Members, and Reviewers must publicly disclose relevant relationships
- Recusal is required for any vote on self-submitted proposals
- Anonymous reviewers (if used) must submit written rationale; logs must be audit-friendly
- Limit: One paid role per individual per quarter.

5. Treasury Management

5.1 Compensation Model

- Compensation is based on impact, innovation, quality of delivery, and measurable outcomes.
- Compensation is not determined by contributor country salary benchmarks.

5.2 Stipends

- DAO Leader stipends are not automatic, they must be tied to clearly defined tasks and milestone-based deliverables.

5.3 Task Board

- The DAO maintains a permanent Task Board for small mandates and operational needs.
 - No formal Snapshot vote required.
 - Paid upon verified delivery.
 - Open to eligible DAO members.

5.4 Annual Bonus Allocation

- An annual bonus may be allocated from reserves to the best proposal of the year, selected by community vote.

5.5 Suspension Clause

- Any role, mandate, or initiative may be temporarily suspended if clearly harming execution, governance integrity, or overall DAO momentum.

5.6 Transparency and Accountability

- Monthly treasury and revenue dashboards published to the community
- Quarterly reporting required by each working group
- Public access to all proposals, vote results, and treasury activity

5.7 Budgeting

- Annual cap: 100,000 USDT

- RBNT: 10M total available for DAO incentives
- 10% minimum allocation reserved for Open Innovation

6. Contributor Expectations

- RBNT and/or USDT may be awarded through:
 - Contributor roles and grants
 - Community quests and bounties
 - Workstream-specific reward programs
- Tasks and grants must define:
 - Clear KPIs and measurable success criteria.
 - Timeline, milestones and reporting structure.
 - Reward structure (RBNT/USDT)
 - Compensation prioritises measurable ecosystem value creation
- Missed deadlines without comms may result in reassignment and frozen payment

Where appropriate, contributors may also be rewarded in tokens directly related to supported projects or initiatives, to better align incentives with ecosystem value creation.

7. Community Involvement

- [Founding Principles](#) (see Section 9) will be reviewed and proposed by the DAO in collaboration with other Leadership
- All approved contributors will be acknowledged via:
 - Discord
- DAO participation is community-based and voluntary; responsibilities equivalent to formal employment within the Redbelly core team remain outside the DAO's scope. This separation ensures fairness between community contributors and formal employees
 - DAO report mentions
 - Public archive of completed work
- Regular governance calls shall be held weekly for Leaders and monthly for the full DAO. No formal voting occurs during calls, and notes must be publicly shared.
- Long-term Economic Sustainability: The DAO commits to sustainability through budget planning, responsible treasury management, potential operation of a node, staking, and investment in RWAs on Redbelly.

8. Amendments

Changes to this Constitution must follow:

- 7-day proposal notice
- 5-day voting period with all DAO members (as well as High Council as part of this)
- Majority approval via token-weighted vote
- Version control and public publishing required for each update
- Exceptions to constitutional rules may be discussed if supported by at least 50% of the combined High Council and General DAO Leadership, provided such exceptions do not permanently override the formal amendment process.

9. Founding Principles

- Transparency and Auditability

All proposals, votes, budgets, and outputs should be publicly visible, with rationale and documentation wherever possible.

- Fair Access, with Structured Onboarding

Participation should be open, but gated by contribution and reputation, not popularity or influence.

- Merit-Based Funding and Roles

Funding is earned through clear deliverables and value – not connections or titles. No role is permanent, and all are accountable.

- Progressive Decentralisation

DAO governance will start with strong leadership but shift toward wider community control as capacity and clarity grow.

- Constructive Collaboration over Silos

Collaboration is encouraged across domains and surface disagreements early.

- Alignment with Redbelly's Infrastructure Vision

DAO activity must reinforce Redbelly's broader ecosystem goals: scalable, secure, and institution-grade blockchain infrastructure.
